USAID – OVC Meeting

September 2006

“OUTREACH”

Database Software

Main Objectives

- ~ To provide all Bambisanani Stakeholders with a tool to monitor home based care
- ~ To cost various aspects of the project
- ~ To identify the strength and weaknesses of the interventions

“OUTREACH” Database Software

- Allow to capture detailed information on:
 - ~ Care Supporters & Associated Care Givers
 - ~ “Clients”
 - ~ Home visits
 - ~ Income Generating Activities (IGA)
 - ~ Employers
- To generate standard and ad-hoc reports

“OUTREACH”

Report Examples

- No. of Care Supporters and Care Givers by Location
- No. of Clients, their distribution by Gender, Age, Status, Location
- No. of Visits conducted and the Reasons
- No. of Orphan and Vulnerable Children (OVC), their distribution by Age, Gender
- No. of Dead Clients and the length of stay on the HBC program

“OUTREACH”

Home Based Care Indicators

- Monthly Reporting Rate
- Monthly Care Giver/Supporter visit rate
- No. of New Clients
- Clients Cessation rate
- HIV load
- HIV death rate
- TB Load
- TB Death rate
- Clinic Referral rate
- Hospital Referral rate

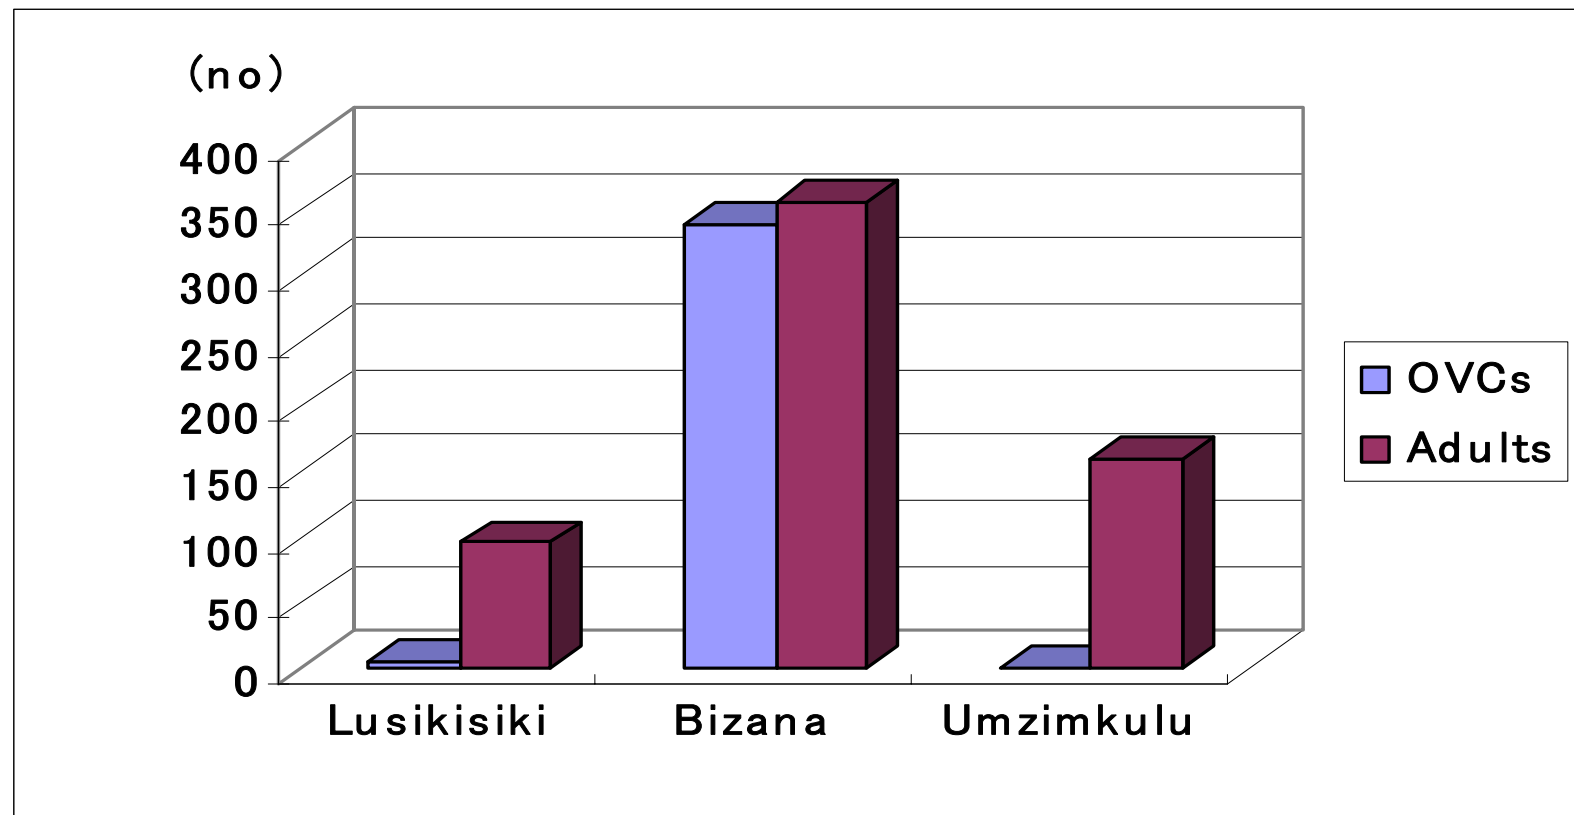

"OUTREACH"

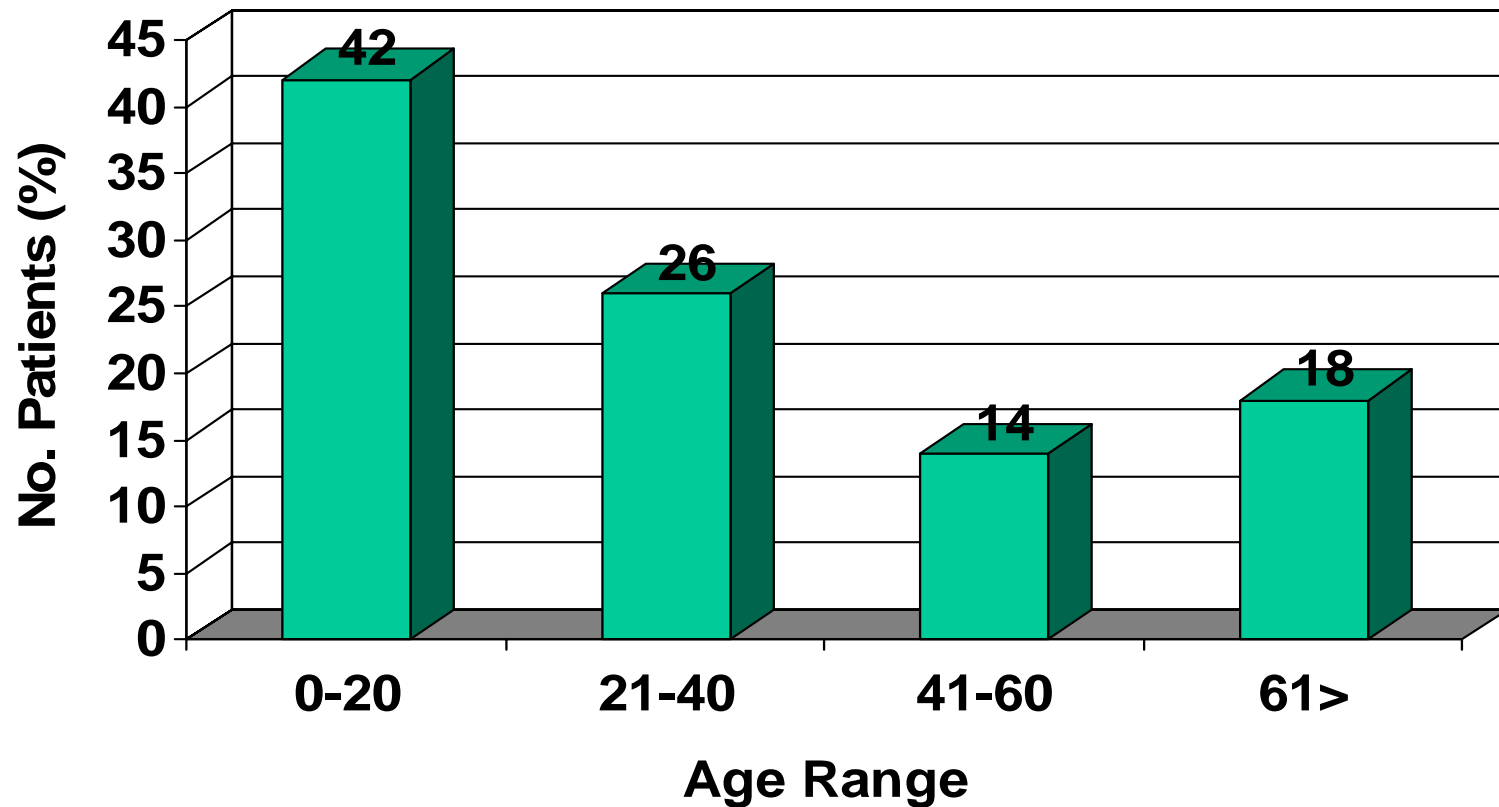

Orphaned and Vulnerable Children Indicators

- Monthly OVCs workload
- No. of New OVCs accepted
- Clinic utilization rate
- % eligible OVCs not attending school
- % eligible OVCs without food
- Family visit rate

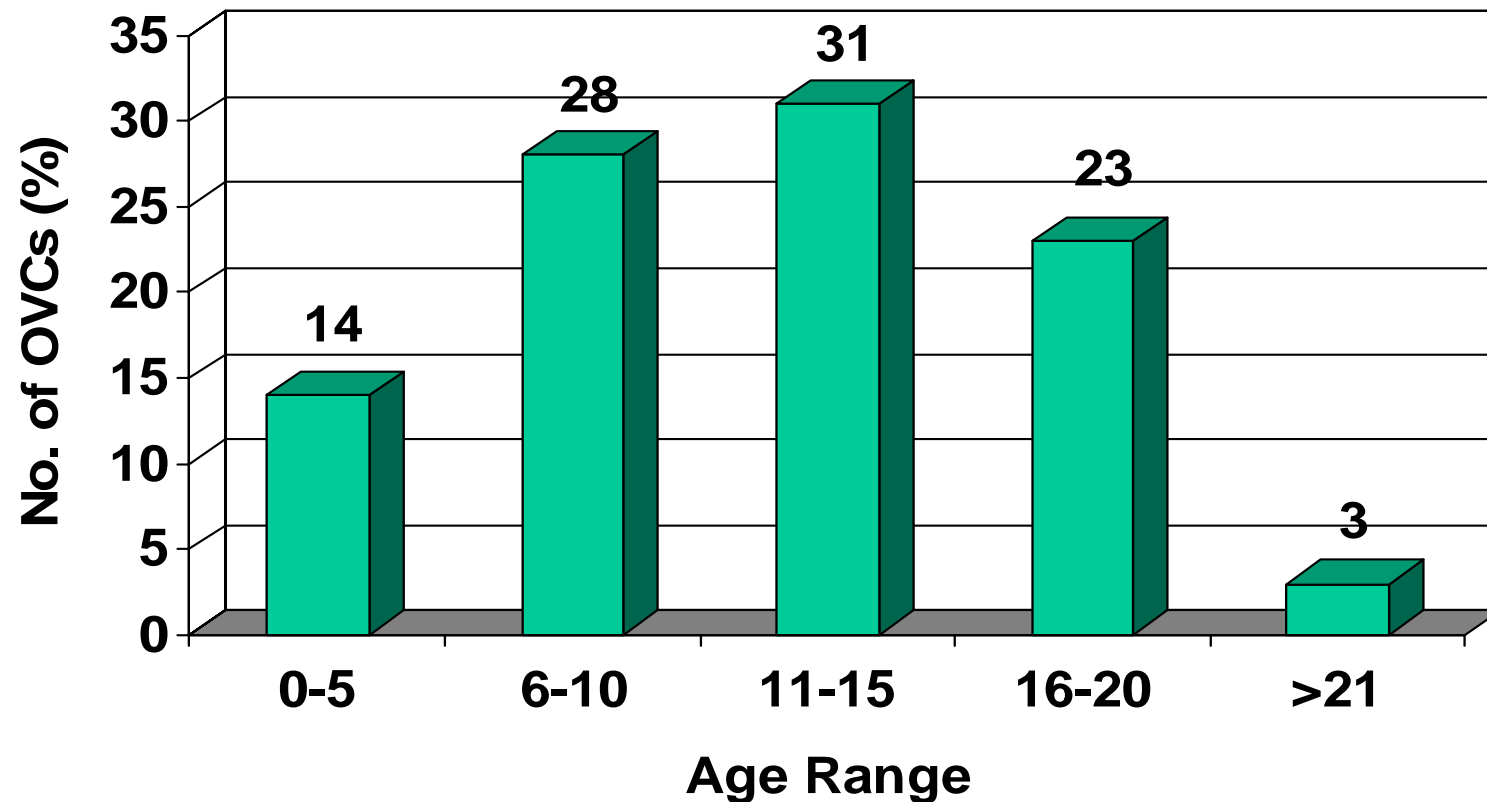

Sub District Distribution of "Outreach" Registered Clients

Age Distribution of “Outreach” Registered Patients

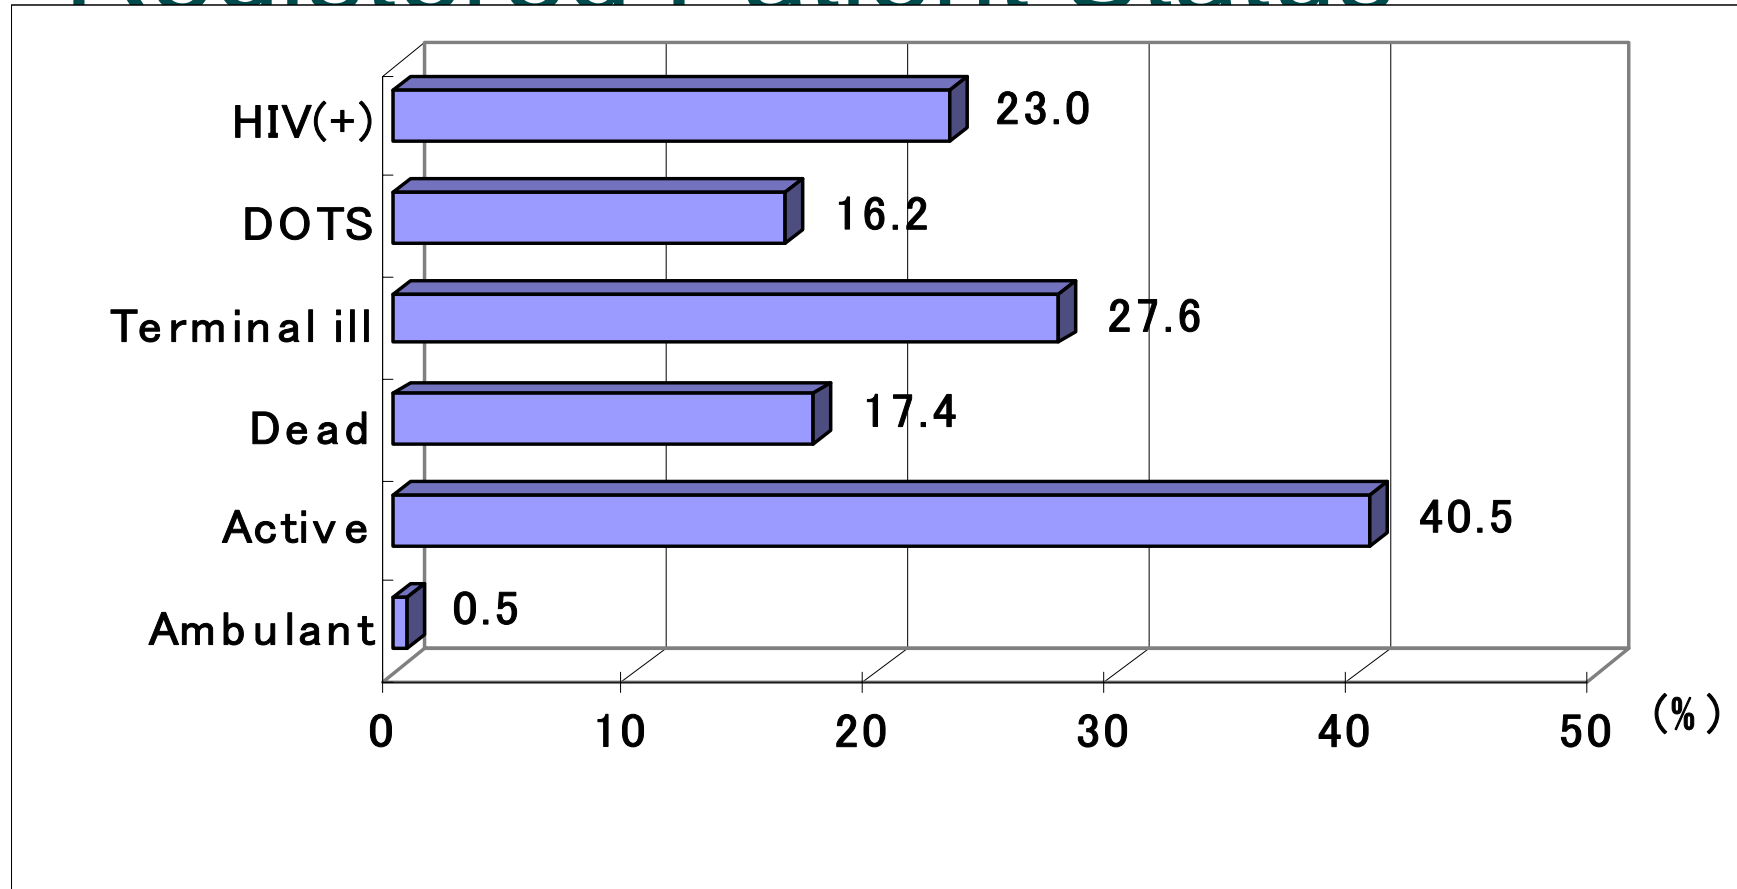

Age Distribution of “Outreach” Registered OVCs

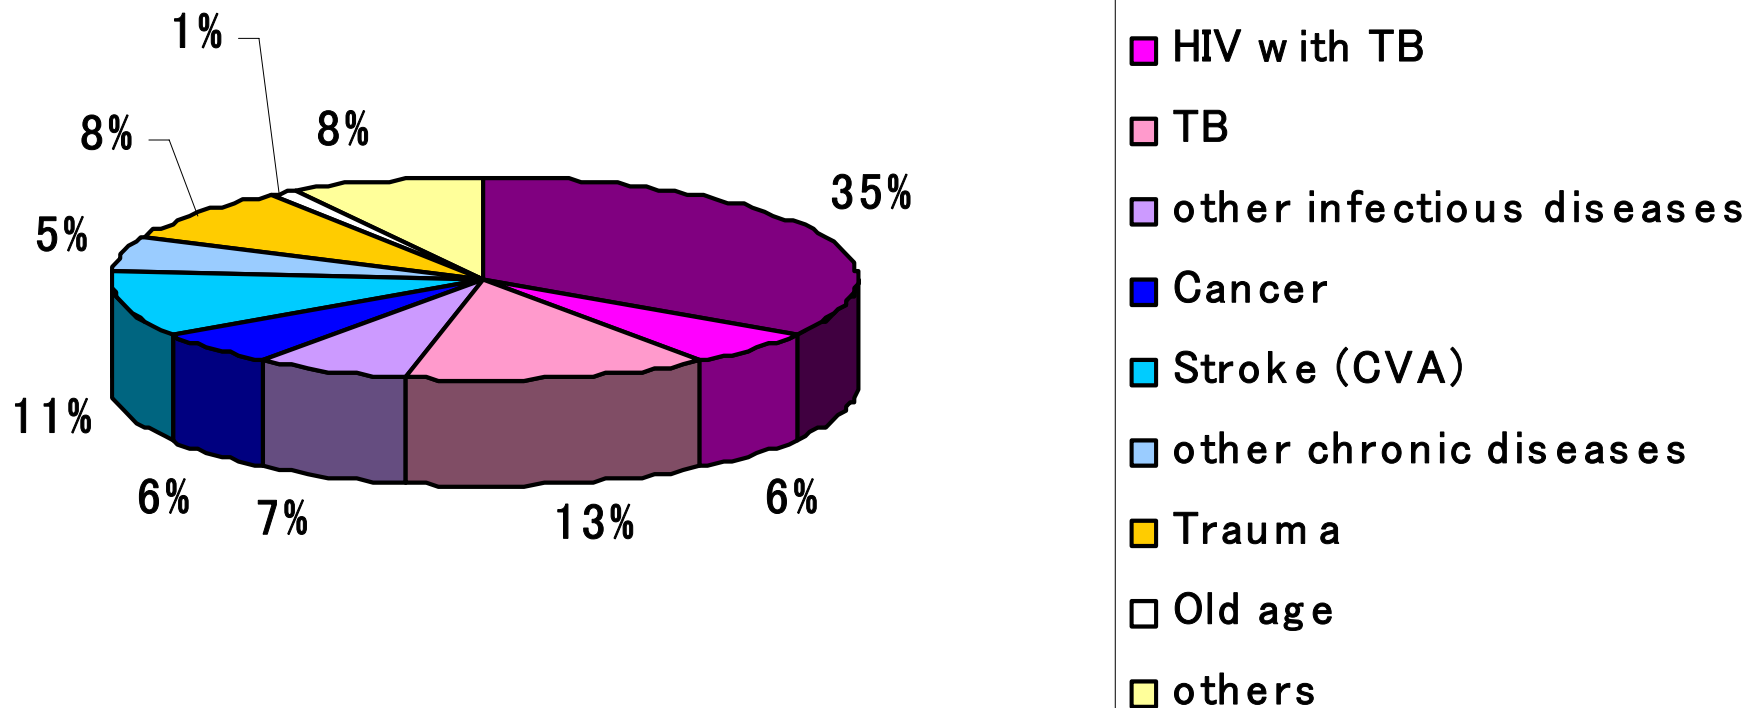

"OUTREACH"

Registered Patient Status

10 Top Reasons for home visits

“OUTREACH” The Challenges

- System development Vs. Implementation
- Less Data provide more information
- Feed-back to key players
- Create information culture
